ABOUT ME

Frontend & React Native Engineer with 3+ years of experience building production-ready web and mobile applications.

Experienced in developing scalable user interfaces, optimizing performance for large datasets, and integrating APIs in real-world products used by active users.

Currently seeking a remote opportunity to contribute to a product-focused team while continuing to grow as an engineer.

EDUCATION

UNIVERSITY OF THE PEOPLE

B.Sc. Computer Science

2024-PRESENT

FEDERAL POLYTECHNIC, ADO-EKITI

National Diploma in Computer Science

2016-2018

SKILL

Frontend: React, Next.js, TypeScript, Tailwind CSS, Shadcn/ui

Mobile: React Native (Expo)

Tools: Git, CI/CD (GitHub Actions, Azure DevOps)

Backend: REST APIs, FastAPI

WORK EXPERIENCE

Localbuka, Nigeria- Freelance Frontend Engineer

Dec 2025 - Present

Contract Project: Localbuka (Restaurant Discovery Platform)

- Designed and developed a restaurant discovery web application enabling users to browse, search, and explore food options
- Built responsive and user-friendly interfaces using Next.js and TypeScript
- Implemented core features including restaurant listings, filtering, and dynamic content rendering
- Integrated backend APIs to manage real-time data and user interactions
- Developed the company's marketing website to support product visibility and user acquisition
- Focused on performance optimization, accessibility, and clean UI/UX

SterlingTech & Data Science, Nigeria- Frontend Engineer

OCT 2023 - JAN 2026

At SterlingTech we develop and support a range of innovative software solutions and services that improve the quality of work, processes and efficiency to our clients across public and private sectors.

- Led frontend development for People's Store, an AI-powered e-commerce platform, using Next JS, TypeScript, Shadcn/ui, Tailwind CSS, Redux, and FastAPI
- Built AI-enhanced features such as typo tolerance, voice-to-text input, and smart relevance filtering
- Led frontend development for DATR(Directorate of Air Transport Regulation) using React, TypeScript, Tailwind CSS, Redux.

Jupiter.io, Nigeria - Mobile Engineer

FEB 2025 - AUG 2025

We are creating the next-generation online shopping interface. Our mission is to reinvent the e-commerce experience - transforming the fashion industry, using VR, AR, and AI integration.

- Built core features of a social fashion mobile app using React Native (Expo + TypeScript), published on Play Store
- Implemented post feed, comment system, and user interaction flows for content engagement
- Optimized performance for large lists and real-time interactions
- Integrated APIs and handled mobile-specific debugging and performance issues

Keepsafe ng, United Kingdom – Frontend Engineer**Nov 2024 – DEC 2025**

Keepsafe is a digital identity and document verification platform designed to help individuals and organizations securely manage personal records.

- Built Keepsafe mobile app and admin web interface from scratch using React Native (mobile) and React Vite + Tailwind CSS + Shadcn/ui (admin)
- Developed OAuth authentication (Azure) and secure file uploads and Created profile setup, document verification, role-based dashboards, and voting system.

TAWOL Technologies, Nigeria– Frontend Engineer**FEB 2023 – APR 2024**

World-class ERP solutions for organizations that serve the public good. We believe that efficient technology should be accessible to all, regardless of size or budget constraints.

- Developed multiple internal platforms: Client Manager, Lead CRM, Save For Future, TBS Suite using React, React Native, Redux.
- Collaboration & Integration: Worked closely with backend developers to integrate front-end interfaces with back-end functionalities for a cohesive user experience.
- Continuous Integration/Deployment Pipeline Integration, pull requests, code reviews, unit and integration testing

Delbott, Nigeria– Mobile Engineer**SEPT 2022 – DEC 2023**

Delbott is a technology-driven logistics startup focused on streamlining last-mile delivery operations. The company provides courier and delivery businesses with intuitive tools to manage orders, track deliveries in real time, and improve operational efficiency through mobile-first solutions.

- Built Delbott logistics app with delivery management features using React Native
- Designed login/onboarding flows and improved delivery efficiency through intuitive interfaces.
- Designed and implemented a robust delivery management system for efficient order handling.
